DETAILED ACTION

1. The following is an examiner's statement of reasons for allowance: The claimed invention for tuning a EAM by using the voltage or temperature in order to control the average output power which is matched to a supplied reference average output power or an eye crossing point diagram is not shown or suggested by the prior art .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reference 5959764 shows controlling the system using temperature control. Reference 6590686 discloses in fig. 16 optimizing the power output. Reference 6661556 is one of the inventors' previous patent that shows a similar technique but different referencing system.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard Hanig whose telephone number is 571-272-2329. The examiner can normally be reached on M-F: 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Georgia Epps can be reached on 571-272-2328. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
